## **BEANS, CHEROKEE WAX**

This new Bean has same shape and length as Stringless Black Valentine. The pods are golden yellow. We believe it will replace most other Wax varieties. Listed on page 4.

## **CABBAGE, GOLDEN ACRE DISEASE-RESISTANT**

Our strain is the earliest maturing found anywhere. Can be planted as close as 14 inches in the row, having short outer leaves. Highly resistant to "Yellows-Disease." Listed on page 6.

## **CELERY, UTAH PASCAL**

Truly a "Giant" of the Celery tribe. It was especially bred for climatic and soil conditions as are found in Michigan and Ohio. Stalks are well rounded and long jointed. The finest ever produced for selling "green." See page 9.

## **LETTUCE, SUPER GREAT LAKES**

A great improvement in Head Lettuce. The ribs of the leaves are less pronounced. It matures 8 to 10 days earlier than regular Great Lakes. The heads are large and solid. Recommended for hotbed seeding and early in the field. See page 13.

## **SWEET CORN, LINCOLN HYBRID**

This marvelous hybrid is known as one of the best wilt-resisting and heat-resisting crosses. It matures in 82 to 84 days, producing ears  $7\frac{1}{2}$  to 8 inches long with 14 rows of deep, narrow kernels. Stalks grow about 7 feet tall. See page 10.

## **RADISH, CHERRY-BELLE**

Something new in Radishes. The shape is like a Cherry, therefore, more round than Cavalier. The color is rosy red. Tops are short but firm. For summer crop in muck soil it will grow fast and yet remain hard. Listed on page 18.

## **TURNIP, RED TOP WHITE GLOBE**

Our stock of this Turnip is the best seen on the markets. The crowns are reddish purple and the lower part pure white. They are smooth and exceedingly uniform in size. Listed on page 21.
